AMENDMENTS TO CLAIMS

Please cancel claims 1-77 and add new claims 78-87 as follows below. This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1-80. (canceled)

81. (new) In a computer system, a method for obtaining and displaying information relating to the existence of at least one object in an image comprising:

- obtaining image data comprising at least one person;
- presenting a client interface configured for a providing user to provide identifying information;
- obtaining said identifying information from said providing user wherein said identifying information comprises information that relates to said at least one person in said image data;
- storing said identifying information in at least one first computer;
- sending an email message automatically via said at least one first computer to at least one contact associated with said providing user where said message relates to the existence of said image data that comprises said at least one person;
- receiving a request for said image data from a first contact;
- obtaining said image data from said at least one first computer in response to said request;
- obtaining said identifying information associated with said image data in said request; and,

Appl. No. 09/991,324  
Response dated 06/28/2005  
Reply to Office Action of 6/22/2005

presenting said image data and said identifying information to  
said first contact that initiated said request.

82. (new) In a computer system, a method for obtaining and  
displaying information relating to the existence of at  
least one object in an image comprising:  
obtaining image data comprising at least one object;  
presenting a client interface configured for a providing user to  
provide identifying information comprising coordinates of  
said at least one object in said image data;  
obtaining said identifying information from said providing user  
wherein said identifying information comprises information  
that relates to said at least one object in said image  
data;  
storing said identifying information in at least one first  
computer;  
sending an email via said at least one first computer to at  
least one contact regarding the existence of said image  
data comprising said at least one object without requiring  
manual transmittal of a manually created email initiated  
from said providing user to each of said at least one  
contact;  
receiving a request for said image data from a first contact;  
obtaining said image data from said at least one first computer  
in response to said request;  
obtaining said identifying information associated with said  
image data in said request; and,  
presenting said image data and said identifying information to  
said first contact that initiated said request.

83. (new) In a computer system, a method for obtaining and displaying information relating to the existence of at least one object in an image comprising:

obtaining image data comprising at least one person;

presenting a client interface configured for a providing user to provide identifying information;

obtaining said identifying information from said providing user wherein said identifying information comprises information that relates to said at least one person in said image data;

storing said identifying information in at least one first computer;

presenting a search interface to a searching user;

receiving a request for at least one search person from said searching user;

performing a query that returns at least one result image data comprising said at least one search person wherein said at least one result image data comprises image data found in at least one album;

obtaining said at least one result image data from said at least one first computer in response to said request;

obtaining corresponding identifying information associated with said at least one search person in said at least one result image data; and,

presenting said at least one result image data and said corresponding identifying information to said searching user that initiated said request.

84. (new) In a computer system, a method for obtaining and displaying information relating to the existence of at least one object in an image comprising:

- obtaining image data comprising at least one person;
- presenting a client interface configured for a providing user to provide identifying information;
- obtaining said identifying information from said providing user wherein said identifying information comprises information that relates to said at least one person in said image data;
- storing said identifying information in at least one first computer;
- presenting a search interface to a searching user;
- receiving a request for at least one search image data from said searching user;
- performing a query that returns at least one result person found in said at least one search image data wherein said at least one result person is found in at least one album;
- obtaining said at least one result person from said at least one first computer in response to said request;
- obtaining corresponding identifying information associated with said at least one result person; and,
- presenting said at least one result person found in said at least one search image data and said corresponding identifying information to said searching user that initiated said request.

85. (new) A system for obtaining and displaying information relating to the existence of at least one object in an image comprising:

Appl. No. 09/991,324  
Response dated 06/28/2005  
Reply to Office Action of 6/22/2005

means for obtaining image data comprising at least one object;  
means for presenting a client interface configured for a  
    providing user to provide identifying information;  
means for obtaining said identifying information from said  
    providing user wherein said identifying information  
    comprises information that relates to said at least one  
    object in said image data;  
means for storing said identifying information in at least one  
    first computer;  
means for sending an email message automatically via said at  
    least one first computer to at least one contact associated  
    with said providing user where said message relates to the  
    existence of said image data that comprises said at least  
    one object;  
means for receiving a request for said image data from a first  
    contact;  
means for obtaining said image data from said at least one first  
    computer in response to said request;  
means for obtaining said identifying information associated with  
    said image data in said request; and,  
means for presenting said image data and said identifying  
    information to said first contact that initiated said  
    request.

86. (new) A system for obtaining and displaying information  
    relating to the existence of at least one object in an  
    image comprising:  
means for obtaining image data comprising at least one object;

Appl. No. 09/991,324

Response dated 06/28/2005

Reply to Office Action of 6/22/2005

means for presenting a client interface configured for a  
providing user to provide identifying information;  
means for obtaining said identifying information from said  
providing user wherein said identifying information  
comprises information that relates to said at least one  
object in said image data;  
means for storing said identifying information in at least one  
first computer;  
means for presenting a search interface to a searching user;  
means for receiving a request for at least one search object  
from said searching user;  
means for performing a query that returns at least one result  
image data comprising said at least one search object  
wherein said at least one result image data comprises image  
data found in at least one album;  
means for obtaining said at least one result image data from  
said at least one first computer in response to said  
request;  
means for obtaining corresponding identifying information  
associated with said at least one search object in said at  
least one result image data; and,  
means for presenting said at least one result image data and  
said corresponding identifying information to said  
searching user that initiated said request.

87. (new) A system for obtaining and displaying information  
relating to the existence of at least one object in an  
image comprising:  
means for obtaining image data comprising at least one object;

Appl. No. 09/991,324

Response dated 06/28/2005

Reply to Office Action of 6/22/2005

means for presenting a client interface configured for a providing user to provide identifying information;

means for obtaining said identifying information from said providing user wherein said identifying information comprises information that relates to said at least one object in said image data;

means for storing said identifying information in at least one first computer;

means for presenting a search interface to a searching user;

means for receiving a request for at least one search image data from said searching user;

means for performing a query that returns at least one result object found in said at least one search image data wherein said at least one result object is found in at least one album;

means for obtaining said at least one result object from said at least one first computer in response to said request;

means for obtaining corresponding identifying information associated with said at least one result object; and,

means for presenting said at least one result object found in said at least one search image data and said corresponding identifying information to said searching user that initiated said request.

88. (new) In a computer system, a method for obtaining and displaying information relating to the existence of at least one object in an image comprising:

obtaining image data comprising at least one object;

presenting a client interface configured for a providing user to provide identifying information;

Appl. No. 09/991,324  
Response dated 06/28/2005  
Reply to Office Action of 6/22/2005

obtaining said identifying information from said providing user wherein said identifying information comprises information that relates to said at least one object in said image data;  
storing said identifying information in at least one first computer;  
sending an email message automatically via said at least one first computer to at least one contact associated with said providing user where said message relates to the existence of said image data that comprises said at least one object;  
receiving a request for said image data from a first contact;  
obtaining said image data from said at least one first computer in response to said request;  
obtaining said identifying information associated with said image data in said request; and,  
presenting said image data and said identifying information to said first contact that initiated said request.

89. (new) In a computer system, a method for obtaining and displaying information relating to the existence of at least one object in an image comprising:  
obtaining image data comprising at least one object;  
presenting a client interface configured for a providing user to provide identifying information;  
obtaining said identifying information from said providing user wherein said identifying information comprises information that relates to said at least one object in said image data;

Appl. No. 09/991,324  
Response dated 06/28/2005  
Reply to Office Action of 6/22/2005

storing said identifying information in at least one first  
computer;  
presenting a search interface to a searching user;  
receiving a request for at least one search object from said  
searching user;  
performing a query that returns at least one result image data  
comprising said at least one search object wherein said at  
least one result image data comprises image data found in  
at least one album;  
obtaining said at least one result image data from said at least  
one first computer in response to said request;  
obtaining corresponding identifying information associated with  
said at least one search object in said at least one result  
image data; and,  
presenting said at least one result image data and said  
corresponding identifying information to said searching  
user that initiated said request.

90. (new) In a computer system, a method for obtaining and  
displaying information relating to the existence of at  
least one object in an image comprising:  
obtaining image data comprising at least one object;  
presenting a client interface configured for a providing user to  
provide identifying information;  
obtaining said identifying information from said providing user  
wherein said identifying information comprises information  
that relates to said at least one object in said image  
data;  
storing said identifying information in at least one first  
computer;

Appl. No. 09/991,324  
Response dated 06/28/2005  
Reply to Office Action of 6/22/2005

presenting a search interface to a searching user;  
receiving a request for at least one search image data from said  
searching user;  
performing a query that returns at least one result object found  
in said at least one search image data wherein said at  
least one result object is found in at least one album;  
obtaining said at least one result object from said at least one  
first computer in response to said request;  
obtaining corresponding identifying information associated with  
said at least one result object; and,  
presenting said at least one result object found in said at  
least one search image data and said corresponding  
identifying information to said searching user that  
initiated said request.
